

Phoenix FD for 3ds Max

Product Overview

Phoenix FD™ is a powerful tool for fluid simulations. Aimed to meet the needs of VFX artist to simulate fire, smoke, explosions as well as liquids, foam and splashes, it has now become universal simulation software for every production house. Phoenix FD offers exceptional flexibility and speed. With an adaptive grid, complete interactivity, a GPU accelerated preview and a fully multi-threaded displacement algorithm it stands out as one of the top solutions for fluid simulations in the visual effects industry.
